PROFILE SUMMARY

DevOps and Cloud Engineer with 6 months of internship experience across GCP and AWS, building CI/CD pipelines, Kubernetes platforms, and DevSecOps workflows. Holds Oracle Cloud Infrastructure 2025 Certified DevOps Professional certification. Proficient in AI-assisted development (Cursor, modern coding agents). Seeking entry-level DevOps Engineer or Cloud Engineer roles.

SKILLS

Programming: Python, Shell Scripting, YAML

Cloud & DevOps: GCP, AWS, Docker, Kubernetes, Jenkins, Cloud Build, GitHub Actions, Terraform, ArgoCD, APIGEE, Auto Scaling

Monitoring & Security: Prometheus, Grafana, SonarQube, Trivy, Observability, Alerting

Tools & OS: Git, GitHub, Linux, Cursor, GitHub Copilot

EXPERIENCE

Cloud Engineer Intern – CoreXtech IT Services Pvt. Ltd

Jun 2025 – Sep 2025

Remote – Pune

- Provisioned multi-tier AWS infrastructure (EC2, VPC, RDS, IAM, S3) with subnet segregation, NAT Gateway, and least-privilege IAM policies per AWS Well-Architected Framework.
- Built Jenkins and GitHub Actions pipelines with SonarQube SAST and Trivy scanning; deployed Prometheus and Grafana observability stack with alerting.

DevOps Engineer Intern – DevAngles Software Pvt. Ltd.

Dec 2025 – Mar 2026

On-site – Ahmedabad

- Automated CI/CD pipelines using Google Cloud Build and GitHub triggers for Docker builds and Cloud Run deployments, eradicating 100% of manual deployments.
- Architected GKE Kubernetes platform with Helm chart deployments and ArgoCD GitOps sync, achieving 99.9% uptime and sub-5-minute automated rollbacks.
- Established keyless authentication via Workload Identity Federation between GKE and GCP IAM, directly reducing manual credential management by 100% for cloud services.

PROJECTS

Autonomous DevOps Platform – K8s · GitOps · CI/CD · DevSecOps

- Built end-to-end CI/CD via Cloud Build & GitHub Actions with Trivy and SonarQube SAST on every commit; deployed on GKE via Helm and ArgoCD—99.9% uptime, 80% reduction in manual effort. [GKE, Helm, ArgoCD, Cloud Build, Docker, Trivy, SonarQube, Prometheus, Grafana, Terraform]
- Enforced zero-trust Kubernetes security with RBAC, Workload Identity, and Secrets Management; integrated Prometheus & Grafana with custom dashboards and alerting.

AWS 3-Tier Secure Infrastructure – Terraform · IaC · Jenkins · Monitoring

- Provisioned complete 3-tier AWS architecture (web, app, database) using Terraform IaC with S3 remote state and DynamoDB locking; configured VPC, ALB, Auto Scaling Groups, RDS MySQL, and IAM roles per AWS security best practices.
- Automated code scanning and security checks by integrating Jenkins with SonarQube and Trivy, directly improving the security posture of 20+ microservices.

EDUCATION

Vishwakarma Government Engineering College

Bachelor of Engineering in Computer Engineering

Jun 2022 – Jun 2026

Chandkheda, Gujarat

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified DevOps Professional

Apr 2025

AWS Cloud Quest: Cloud Practitioner | Amazon Web Services

Sep 2025
